CHARACTERS IN THESE SHOTS
MARIAMMA, YOUNG ANJALI, VARGHESE, APPACHAN, KANNAN, LATHA, FATHIMA, MARIAMMA-FERNANDEZ-D'CRUZ-OF-MUNAMBAM, RAHUL

DONE	IMAGE	SHOT	DESCRIPTION	SIZE	MOVEMENT	ANGLE	LENS
○		118A	Establishing wide of the keeper's room from the door **Characters:** MARIAMMA **Storyboard:** INT. LIGHTHOUSE KEEPER'S ROOM #1 **Sound:** Room tone **Camera:** Warm key from the window.	**Wide**	Static	Eye level	24mm

DONE	IMAGE	SHOT	DESCRIPTION	SIZE	MOVEMENT	ANGLE	LENS
☐		118B	Slow, continuous Steadicam move that starts on the cracked lens of the lighthouse lamp, pulls back through the broken glass to reveal the keeper's room, tracks past the overturned table, the unlit stove and the hand-drawn tide chart pinned to the wall, and settles on Mariamma kneeling at the open hatch with the radio against her ear, all without a cut. Cover the same move twice: once with the practical lantern only and once with the bounce board on the left so the production can choose in the grade. Child performer may be present in the background of take three. **Characters:** MARIAMMA, YOUNG ANJALI, VARGHESE, APPACHAN, KANNAN, LATHA, FATHIMA **Storyboard:** INT. LIGHTHOUSE KEEPER'S ROOM #2, INT. LIGHTHOUSE KEEPER'S ROOM #3 **Sound:** Record a clean 60-second room tone before the first take, then wild lines from each position; sound department to confirm playback levels with the 1st AD before the unit moves, and again after lunch. **Camera:** two bodies, A on the Steadicam, B on sticks at the hatch as a safety. Focus puller marks at 4 ft, 7 ft and 12 ft. Gaffer needs 10 minutes to flag the skylight after the first take. Stunt coordinator to confirm the hatch is secured before the actor kneels. DIT to review the first take on set before the unit moves on.	**Extreme wide to medium close-up, continuous**	Steadicam: lamp, pull back, track left, settle on hatch	Low, rising to eye level	21mm (Steadicam) / 35mm anamorphic (B camera)
